

Public Repositories and Data Used for Workflow Mining

Workflows have been sourced from repositories that are still online. The following three data repositories were used:

- https://www.myexperiment.org/workflows?filter=TYPE_ID%28%2276%22%29
- <https://nodepit.com/server/>
- <https://hub.knime.com/search?type=Workflow>

NOTE: These data sources are public repositories and data may have been changed/updated during the duration of our research (September 2019 to July 2023).

The input workflows used in our data analysis have been separately archived and can be made available upon request.
